Re: Stone Energy Corporation - Weekley - 103-00089 - 13-3193A

Stone Energy has applied for a Class I Administrative Update to current permit 13-3193 to remove an emergency generator (GE-2) and a line heater (LH-8) that were either never installed or removed from service. Since the changes will result in no change or reduction of emissions, it is the writers opinion that Stone be granted this Class I Administrative Update.
